

In March

Task of the Month

Find & seal air leaks

Air leaks can be like leaving a window open all the time! Fill or cover gaps with caulk, expanding foam or rigid insulation board.

*Insert an [inflatable draft stopper](#) in your fireplace

* NEED HELP LOCATING PROBLEM AREAS?

Eligible Duke and SCI REMC customers can have a **free** [Home Energy House Call](#). An energy efficiency expert will walk through your house and point out problem areas.

Where to look for leaks?

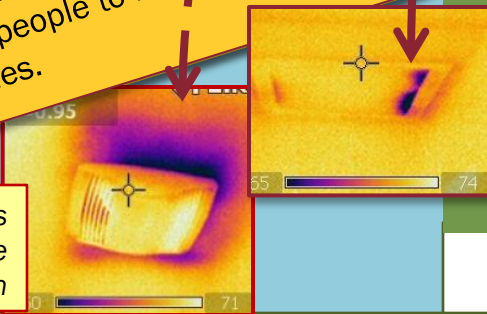

- Fireplace dampers*
- Door and window frames
- Electrical and gas service entrances
- Baseboards
- Weather stripping around doors
- Around wall or window air conditioners.
- Cable TV and phone lines
- Where dryer vents pass through walls
- Ceiling vents and fans
- Attic hatches
- Electrical outlets
- Switch plates

Foam outlet and switch plate inserts are effective, inexpensive and easy to install.

Need help finding & sealing leaks?
Volunteers will be visiting neighborhoods with our EnergyMobile, stocked with supplies, a thermal camera, and people to help neighbors weatherize their homes.

Thermal cameras can show where air is leaking in

Cost: \$15 - \$300

Est. Savings: \$70/year

Difficulty: Moderate
